

History of unsatfit

from [unsatfit](#) document: <https://sekika.github.io/unsatfit/history.html>

- 2006-07-28: Created SWRC Fit 1.0 ([土壌の物理性](#) version). See [History](#) and [source code](#) of the Octave version.
- 2007-02-27: Released SWRC Fit 1.1 ([HESSD](#) version) and the launched the [web version](#).
- 2016-09-10: Released [SWRC Fit 3.0](#); implemented the FX model was at the request of a geotechnical engineer.
- 2016-09-15: Presented SWRC Fit at the Japanese society meeting [地盤工学研究発表会](#).
- 2017-03-15: A Japanese-language paper describing SWRC Fit was published. It is the first in a series of papers: (1) [model](#), (2) [running](#), and (3) [algorithm](#).
- 2018-09-27: Released [SWRC Fit 3.1](#) (final Octave version).
- 2021-08-13: SWRC Fit was recommended at [土壌の物理性](#).
- 2021-11-24: A [paper](#) written with unsatfit was published at VZJ.
- 2022-01-04: Released unsatfit 4.0, including a new version of SWRC Fit.
- 2022-10-29: Presented at the Japanese society of Soil Physics meeting [土壌物理学会](#).
- 2023-01-06: Released the [UNSODA viewer](#), a web app that displays data from [UNSODA 2.0](#). For each dataset, water retention data is linked directly to SWRC Fit for model fitting.
- 2023-02-04: A [paper](#) introducing unsatfit was published in JHH.
- 2023-03-19: Released unsatfit 4.9 with improved dual-VG fitting and an option to change the figure legend font to better support Japanese text.
- 2023-08-30: Presented improvements to dual-VG fitting at the JSIDRE meeting [農業農村工学会](#).
- 2023-10-07: Released unsatfit 5.0 with support for the corrected AIC.
- 2023-12-21: Improvements to dual-VG fitting were published on [土壌の物理性](#) in Japanese.
- 2024-03-13: The [user manual for SWRC Fit and unsatfit](#) was published in JTUNS.
- 2024-05-14: [hystfit](#), a tool for calculating SWRC hysteresis, was released.
- 2024-06-04: Released unsatfit 5.2; SWRC Fit now includes output options for parameter uncertainty, added at the [user's request](#).
- 2024-06-10: Added [Zenodo integration](#) for permanent archiving.
- 2024-10-20: Received the JSSP award ([土壌物理学会賞](#)) from the Japanese Society of Soil Physics for the [paper of dual-VG fitting](#). A [summary report](#) was subsequently published in Japanese. [Movie in Japanese](#).
- 2024-11-13: Presented a [poster](#) on hysteresis and [hystfit](#) at [ASA, CSSA, SSSA meeting](#); took a [photo with Rien van Genuchten](#).
- 2025-03-11: Provided [sample code for drawing water retention curves](#) after [discussion](#).
- 2025-03-29: Released unsatfit 5.3; at [user's request](#), initialization functions (`get_init` and `get_wrf`) are now available for all [models](#). Expanded [WRF Sample codes](#).
- 2025-05-08: [Presented](#) on multimodal soil hydraulic models and unsatfit at [Rien van Genuchten conference](#) in Rio de Janeiro. [Movie](#)
- 2025-08-13: Released unsatfit 5.4; added functions for [pore-size distribution](#) analysis.
- 2025-08-13: Released [pdfgridcat](#), a tool for arranging multiple figures like [this](#).
- 2025-09-29: Released unsatfit 6.0; added [trimodal models](#) and an option for isothermal hydraulic conductivity to the `set_model()` method.
- 2025-10-17: Described [how to read data from Excel](#).
- 2026-01-20: Released unsatfit 6.1 with improved parameter handling.
